## ABOUT US

Established in August 2003, **FRANCO AND NEWMAN NIG. LIMITED** (RC NO: 488386) is a Oil and Gas Company registered and operated in Nigeria and providing and performs oil and gas exploration, refining, sales and distribution of petroleum products and implementation of petrochemical and energy projects. FNM was specifically designed to meet the growing demand for national and international oil and gas services with a unique approach that exceeds traditional expectations. We offer value added services with a specific focus on customer needs and unmatched communications.

Our operational, finance and management team have been selected for their broad knowledge of the industry, their dedication to customer service and for their motivation to strive for the best results for our clients.

Attention to safety, security and compliance is very much a part of the fabric of FNM staff and culture. Franco & Newman Nig. Ltd monitors upcoming and potential changes to legislation and industry requirements to ensure our client's interests are protected at all times.

# CORROSION CONTROL

**THE NEED TO MANAGE AND MITIGATE CORROSION DAMAGE HAS RAPIDLY INCREASED AS MATERIALS ARE PLACED IN MORE EXTREME ENVIRONMENTS AND PUSHED BEYOND THEIR ORIGINAL DESIGN LIFE.**

At Franco & Newman Nigeria Limited we ensure a long-term, cost-effective, system integrity and an all-round integrated approach in oil pipes corrosion prevention and management, based on the use of inspection, monitoring, mitigation, sandblasting or abrasive blasting, forensic evaluation, and prediction. We offer cutting edge corrosion management services that stands the test of time and anchored on strong safety measures, one that conforms with environmental best practices

A corroded oil or gas pipeline presents clear risk to the environment, and represents a serious liability for the companies responsible. The challenges associated with preventing this issue are significant and obvious: With oil or gas moving through the pipeline, there is serious potential for the materials to wear down over time. Furthermore, the environments the pipes run through can provide their own risk factors. The sheer scale of the pipelines is another worry: How can companies keep an eye on the whole length of the structure? Oil and gas companies are responding to the multiple challenges with a variety of creative and determined prevention approaches. Studying the ins and outs of pipeline protection is obviously vital for businesses in the energy sector, and even those outside of the industry may pick up some valuable practices. Franco and New Man has over the years built enormous capacity to tackle the menace associated with pipeline decay and offers professional services in this regard.

NIGERIA LTD.**

## MARINE LOGISTICS

Franco & Neman Marine's operational, technical and safety procedures are revolutionary. The Company's Marine & Logistics Division consistently employs the latest technology throughout our vessels nationwide, while driving the development of new technology in anticipation of our customers' needs. Through strategic alliances, partnerships and exclusive management contracts, F&NM Marine is distinctively focused on remaining a premier transportation and offshore services company.

FRANCO & NEW MAN offers customers a comprehensive suite of support services including crew transportation, platform supply, offshore accommodation, maintenance support, standby safety services and anchor handling and mooring capabilities in both shallow and deep-water environments around the nation.

Our Marine's reputation for professionalism and successful partnering with its customers has put it at the forefront of marine support providers for complex ultra-deepwater developments.

Our operations also cover onshore services such as swamp in areas of refurbishment of flow stations, onshore leasing and barging services. We have in our fleet swamp barges, pusher tugs, crew boats and accommodation modules for crew comfort in swampy locations.

In today's market, there is no substitute for professionalism. FRANCO & NEW MAN Marine's personnel, both shoreside and aboard vessels are committed to safety and service excellence.

## CARGO HANDLING & STORAGE

For the storage of consolidated cargo, our company uses the most modern warehouse equipped with high-performance equipment that ensures the safety of goods while in the warehouse and the safe transportation of cargo to the point of destination.

Repacking procedure eliminates the risk of spoilage of the consolidated cargo. Having taken advantage of the delivery of consolidated cargo offered by us, the customer gets several major advantages, first of all reduction of delivery expenses. This is because the costs of transportation are evenly distributed among several participants in the process. There are minor costs in case of small cargo, which is especially important for the international delivery of goods.

## MARINE SUPPORT SERVICES

We have years of experience in executing orders and finding the exact products or substitutes for our client with the best quality and reasonable prices. Our experience and continuous efforts over the years have made FRANCO AND NEWMAN OIL & GAS one of the most efficient and reliable companies in the shipping support sector. Moreover, our philosophies of providing the best value for money allows us contribute to the reduction of our customer's operational expenses. Our company tailors its services to meet the demand. Furthermore, we cater to our customers' needs round the clock, offering the widest range of high quality products and services. We have the capability to supply everything, from the smallest cargo ship to the largest cruise vessel.
